TABLE: SPRIDEN

CREATOR: SATURN

Person Identification/Name Repeating Table

```
=================================================================================================
Column Name                      Type      Width Scale  Nulls   Column Comments
=================================================================================================
SPRIDEN_PIDM                     NUMBER        8           NO    Internal identification number of the person.
SPRIDEN_ID                       VARCHAR2      9           NO    This field defines the identification number used to
                                                                 access person on-line.
SPRIDEN_LAST_NAME                VARCHAR2     60           NO    This field defines the last name of person.
SPRIDEN_FIRST_NAME               VARCHAR2     60           YES   This field identifies the first name of person.
SPRIDEN_MI                       VARCHAR2     60           YES   This field identifies the middle name of person.
SPRIDEN_CHANGE_IND               VARCHAR2      1           YES   This field identifies whether type of change made to
                                                                 the record was an ID number change or a name change.
                                                                 Valid values: I - ID change, N - name change.
SPRIDEN_ENTITY_IND               VARCHAR2      1           YES   This field identifies whether record is person or
                                                                 non-person record.  It does not display on the form.
                                                                 Valid values: P - person, C - non-person.
SPRIDEN_ACTIVITY_DATE            DATE          7           NO    This field defines the most current date record is
                                                                 created or changed.
SPRIDEN_USER                     VARCHAR2     30           YES   USER: The ID for the user that most recently updated
                                                                 the record.
SPRIDEN_ORIGIN                   VARCHAR2     30           YES   ORIGIN: The name of the Banner Object that was used
                                                                 most recently to update the row in the spriden table.
SPRIDEN_SEARCH_LAST_NAME         VARCHAR2     60           YES   The Last Name field with all spaces and punctuation
                                                                 removed and all letters capitalized.
SPRIDEN_SEARCH_FIRST_NAME        VARCHAR2     60           YES   The First Name field with all spaces and punctuation
                                                                 removed and all letters capitalized.
SPRIDEN_SEARCH_MI                VARCHAR2     60           YES   The MI (Middle Initial) field with all spaces and
                                                                 punctuation removed and all letters capitalized.
SPRIDEN_SOUNDEX_LAST_NAME        CHAR         16           YES   The Last Name field in SOUNDEX phonetic format.
SPRIDEN_SOUNDEX_FIRST_NAME       CHAR         16           YES   The First Name field in SOUNDEX phonetic format.
SPRIDEN_NTYP_CODE                VARCHAR2      4           YES   NAME TYPE CODE: The field is used to store the code
                                                                 that represents the name type associated with a
                                                                 person's name.
SPRIDEN_CREATE_USER              VARCHAR2     30           YES   Record Create User: This field contains Banner User ID
                                                                 which created new record
SPRIDEN_CREATE_DATE              DATE          7           YES   Record Create Date: This field contains date new
                                                                 record created
SPRIDEN_DATA_ORIGIN              VARCHAR2     30           YES   DATA SOURCE: Source system that generated the data
SPRIDEN_CREATE_FDMN_CODE         VARCHAR2     30           YES   PII DOMAIN: PII Domain of the user who created the
                                                                 spriden row.
SPRIDEN_SURNAME_PREFIX           VARCHAR2     60           YES   SURNAME PREFIX: Name tag preceding the last name or
                                                                 surname.  (Van, Von, Mac, etc.)
SPRIDEN_SURROGATE_ID             NUMBER       19           NO    SURROGATE ID: Immutable unique key
